| | | |
|---------------------|---|---|
| Databases | : | PostgreSql, Redshift, ElasticSearch, Snowflak |
| Dashboarding Tools | : | PowerBi, Tablue |
| AWS Services | : | S3 |
| Documentation Tools | : | Jira, Confluence, Git |
| Workflow Management | : | Airflow, Azkaban |
| Inhouse Tools | : | Indata, Datashop Client |

Summary Of Projects

Project:-1

Title : Upperline Health

Team Size : 5

Description

Using Innovaccer's Data Activation Platform, Upperline Health creates unified patient records that drive comprehensive, whole-person care management, no matter where they are on the care continuum. Data Activation Platform will also deliver highly actionable data, automated care management workflows, and smart patient engagement.

Roles & Responsibilities:

- Involved in data extraction.
- Involved in data gap analysis and providing the same feedback to customer(upperline Health).
- Involved in payers and attribution data integration.
- Involved in taking customer calls with PM and lead to gather the technical information regarding the task thus implementing in our code.
- Working with a team of 5 members as a Senior resource responsible for giving technical understanding to freshers .
- Also working with a team of 3 members to make them understand how to do unit testing as well as documentation of test cases.

Project:-2

Title : Emtiro Health

Team Size : 5

Description

Using Innovaccer's Data Activation Platform, Emtiro Health creates unified patient records that drive comprehensive, whole-person care management, no matter where they are on the care continuum. Data Activation Platform will also deliver highly actionable data, automated care management workflows, and smart patient engagement.

Emtiro Health supports providers, systems, and payers with unparalleled expertise and knowledge augmented by data and analytics.

Roles & Responsibilities:

- Involved in data extraction.
- Involved in data gap analysis and providing the same feedback to customer(Emtiro Health).
- Involved in payers and attribution data integration.

- Developed various PowerBI dashboards so that customer can have specific insights in patient care and their overall numbers.
- Involving in writing PostgreSQL compatible sql scripts for data integration.
- Involved in demoing dashboards and our products to our customer.
- Involved in UAT to receive feedback from customers and worked upon those feedback to deliver a smooth product to customers.

Project :-3

Title : Chess Health Solutions.

Team Size : 7

Description

Using Innovaccer's Data Activation Platform, CHESS Health creates unified patient records that drive comprehensive, whole-person care management, no matter where they are on the care continuum. Data Activation Platform will also deliver highly actionable data, automated care management workflows, and smart patient engagement.

CHESS Health Solutions supports providers, systems, and payers with unparalleled expertise and knowledge augmented by data and analytics.

Roles & Responsibilities:

- Involved in Database Testing.
- Involved in writing sql script for clinical data ingestion
- Involved in testing of Sisense dashboards.
- Involved in writing sql scripts regarding database migration testing.
- Unit testing of the sql code and Sisense dashboards.
- Have developed dashboards on PowerBI as per client requirement.

Project:-4

Title : HyperWallet – Loyalty and Financial Metrics

Team Size : 9

Description

HyperWallet Loyalty and Financial Metrics was a BI project in which we were receiving client data from different sources i.e. Flat Files, Salesforce and NetSuite e tc. Our final goal was to create a DataMart on top of client data by combining data from all sources and creating interactive and factual tableau reports.

Roles & Responsibilities:

- Verified Tableau Report Using SQL and Tableau
- Worked as a ETL tester
- Requirement Analysis in co-ordination with BA
- Analyzed the data coming from customer using SQL and Excel.
- Involved in regular Scrum meeting and weekly Sprint planning

Personal Details
