- **Worked with Whirlpool Of India as a Global Project Engineer for 2 years 5 months.**
- **Worked with PTC Software Ltd as a QA Analyst for 2 years 9 months.**
- **Worked in Videocon Industries Ltd. Aurangabad as Software Engineer Level I in R&D CE Dept. for 1 year and 7 months .**

### Current Organisation:

**Organization: Whirlpool Asia LLP**

**Designation:Analyst**

**Role: Windchill SME / QA Tech Lead**

**Date of Joining: 1st December 2016 to till date**

**Address: D Block, Ground Floor ,Weikfield IT CITI Park, Opposite Hyatt Hotel, Viman Nagar, India, Maharashtra,Pin Code - 411014**

**Phone: 020 6605 6100**

### Responsibilities and Activities:

- Involved in requirement understanding along with business analysts and finalising implementation approach with solution architects.
- Generate and review test plans, work instructions and procedures from requirements.
- Collaborate with SMEs for creating test cases and scenarios for testing.
- Responsible for test case reviews, test cycle execution, reporting software bugs and tracking till resolution.
- Managing QA resources for timely completion of testing cycle making sure all new features are tested and regression testing is completed with 100% schedule adherence.
- Developed quality standards by participating early in software development stages.

- Work on customization of Type and Attribute Management, Participant Administration, Preference Management, Lifecycle Template Administration, Policy Administration, Workflow Template Administration as per Whirlpool requirement
- Work on customization of Windchill OOTB functionalities as per Whirlpool specific requirements and development of new features and enhancements for Windchill projects for Whirlpool.
- Work on upgrade and update projects for Windchill.
- Conducting User Acceptance Testing (UAT) for newly implemented solutions in PSM projects and supporting users for the same.
- Efficient in using tools like HP QC, Performance center, RTC , Version One , Seibel etc.
- Automation of regression test cases using Qualitia; providing estimates and giving inputs to automation engineers about scenarios, validations to be done for robust automation test cases.
- Develop quality standards by participating early in software development stages.
- Mentoring new team members and knowledge management activities.
- Providing production implementation support
- Daily, weekly and monthly Test status reporting

### **Key Projects:**

#### **A] Whirlpool Global Product Approval [ GPA]**

- Role: Windchill Developer
- Duration : 6 months
- Responsibilities:
  - Requirement understanding with Business Analyst.
  - Finalizing implementation approach with solution architect.
  - Customization of OOTB workflow as per requirements for Global Product Approval.
  - Implementation of new business rules required for GPA.
  - ACL configuration based on requirements - Managing access for team members.
  - Perform FAT and fix defects found during testing.
  - Post deployment support.
  - Mentor junior resources.

#### **B] Windchill 11.1 Upgrade**

- Role: Windchill Developer / QA Lead
- Responsibilities:
  - Identifying new features introduced in the new Windchill version.
  - Work on merging Whirlpool customization with PTC OOTB files.
  - Analyzing upgrade impact and updating existing interfaces to work with new version
  - Perform testing in each rehearsal and fix defects.
  - Communicate with PTC support for any issues.
  - Creating upgrade specific test cases and populating data required for it.
  - Leading the upgrade testing to ensure timely delivery with quality.
  - Develop scripts using Loadrunner for non-functional testing like load test ,endurance test , stress test etc.

#### **C] MOB development**

- Role: Windchill Developer
- Responsibilities:
  - Requirement understanding and refinement for enhancement with Product Owner.
  - Fixing production defects and creating required documentation for the same.
  - Perform FAT and fix defects found during testing.
  - Post deployment support.
  - Mentor junior resources.

### **Previous Organizations:-**

**Organization: Whirlpool of India Limited,**

**Designation: Global Project Engineer**

**Role: Senior Test Engineer**

**Duration: 2 year 5 Months**

**Date of Joining: 05th June 2014**

**Date of Leaving: 30th November 2016**

**Address: D Block, 8th Floor , Weikfield IT CITI Park, Opposite Hyatt Hotel, Viman Nagar, India, Maharashtra,**

**Pin Code - 411014**

**Phone: 020 6605 6100**

### **Responsibilities and Activities:**

- Responsible for test case reviews, test cycle execution, reporting software bugs and tracking till resolution.
- Collaborate with SMEs for creating test cases and scenarios for testing.
- Automation of regression test cases using Qualitia; providing estimates and giving inputs to automation engineers about scenarios, validations to be done for robust automation test cases.
- Designing and implementing automation framework for Windchill testing using Selenium Webdriver , Test NG.
- Knowledge of continuous integration tools like Jenkins and version control systems like GIT, SVN.
- Managing QA resources for timely completion of testing cycle making sure all new features are tested and regression testing is completed with 100% schedule and quality adherence.
- Comprehensive work in performance testing for projects like Windchill, GSA, GES etc.
- Conducting User Acceptance Testing (UAT) for newly implemented solutions in PSM projects and supporting users for the same.
- Efficient in using tools like HP QC, Performance center, RTC etc.
- Defect management in HP QC and re-testing.
- Mentoring new team members and knowledge management activities.

### **Key Projects:**

#### ***A] Product Structure Management for Asia, NAR, LAR, EMEA, China, Hefei Region***

- Role : Windchill Tester
- Responsibilities:
  - Project involves testing of PSM deployments globally in EMEA , India , NAR , LAR and China region.
  - Understanding of new requirements as per region and creating test cases for new PSM workflows and enhancements.
  - Working closely with the development and systems team to get all defects resolved.
  - Conducting User Acceptance Testing (UAT) for newly implemented solutions in PSM projects and supporting users for the same.
  - Deployed in China ( Shenzhen , Shunde cities ) for onsite support for PSM go-live.

---

**Organization: PTC Software (India) Pvt. Ltd,**

**Designation: QA Analyst**

**Role: Test Engineer**

**Duration: 2 Years 9 Months**

**Date of Joining: 29th August 2011**

**Date of Leaving: 30th May 2014**

**Address: D Block, 2nd Floor Weikfield IT Park, Opposite Hyatt Hotel, Viman Nagar, India, Maharashtra,**

**Pin Code - 411014**

**Phone: 020 6605 3000**

### **Responsibilities & Activities:**

- Issue Reproduction, Test Plan Creation and Execution for Temp patch and CPS patches.
- Validating the interaction between various builds of Creo and Windchill releases.
- Working on regression testing for Windchill 10.0, Windchill 10.1, Windchill 10.2, Windchill 11 and MOR's.
- Creating test cases for new features and automating the same using selenium and trail automation.
- Handling Customers Issues related to the Various Creo and Wind-chill interactions Releases.
- Worked as FAT member of Scrum team for testing new content introduced for Windchill 10.1, 10.2 & 11
- Defect reporting, tracking and defect retesting for Windchill and CreoAs part of Scrum team responsible for automating the test cases created in new feature testing.
- Selenium and Trail automation used to automate test cases.
- Running the created test suite regularly to check for any regression issues in new content.

#### **Key Projects:**

##### **A] Functional Acceptance Testing for Windchill 10.2 projects.**

- Role : Functional Acceptance Tester
- Responsibilities:
  - Requirement understanding and refinement for new features from Product Owner.
  - Worked as a Functional Acceptance Tester as part of a scrum team for new features eg. single/multi level report on PSB , event manager implementation using Jason etc. introduced in Windchill.
  - Single level report gave users the idea of the data used in particular CAD assembly along with the number of occurrences of CAD objects used in assembly.
  - Worked closely with development teams to get issues resolved quickly
  - Automation of test cases created for new features using selenium.
  - Execution of automation suites regularly to check for any regression issues in new content.
  - Performing smoke checks when a project is submitted to the main product branch.

**Organization:Videocon Industries Ltd,**

**Designation: Engineer Level - I**

**Role: Software Engineer**

**Duration: 1 Years 7 Months**

**Date of Joining: 20th May 2009**

**Date of Leaving: 25th Dec 2010**

**Address:14 KM Stone, Aurangabad- Paithan Road,Taluka Paithan, Dist Aurangabad, Chittegaon, Aurangabad,Maharashtra,India Pin Code - 431105**

**Phone: 02431 251 505**

#### **Responsibilities & Activities:**

- Development and testing of UI's and enhancements in TV softwares for CRT , LCD and LED TV's.
- Validating functionalities in different brands like Sansui , Philips.
- Working on fixing defects filed by the Quality department and verifying them of development .
- Worked with the production planning department for trail runs with new software versions.

#### **Key Projects:**

##### **A] Philips LED TV: Game Console and Remote Control configuration.**

- Role : Software Engineer.
- Responsibilities:
  - Project involving developing a gaming console for Philips LED TV for Asia region.
  - Understanding of new requirements from business analysts and China team.
  - Developing a new gaming console and testing the same in a development environment.
  - Working closely with the quality department for fixing issues in defined timeline.
  - Configuring Philips LED remote control to add required buttons for game controls.

---

## Technical Skills

---

- ⇒ **Core Java , JSP , HTML , Javascript , Oracle SQL.**
- ⇒ **Certifications: PMP, CSM ,ISTQB, Agile Tester .**
- ⇒ **HP QC, HP LoadRunner, Performance Center, RTC.**
- ⇒ **Basic knowledge of Robotic Process Automation -Automation Anywhere.**

---

## Scholastic Credentials

---

- |      |   |
|------|---|
| 2009 | PG Diploma in Embedded Systems Design from C-DAC, Chennai, secured 75% marks  |
| 2008 | B.E. (Electronics and Telecommunication) from Jayawantrao Sawant College of Engineering, Pune, secured 61.93% marks |
| 2004 | 12 <sup>th</sup> from R.R. Shinde Junior College, Maharashtra State Board, secured 90.17% marks                     |
| 2002 | 10 <sup>th</sup> from New English School, Maharashtra State Board, secured 80% marks                                |

---

## Other Distinctions

---

- ⇒ Active participation in cricket tournaments organized in organisations.
- ⇒ Participation in team building events in organization.
- ⇒ Hard working and dedicated.

---
