## PROFESSIONAL SUMMARY

12+ years of experience driving successful SAP implementations and support across diverse industries, including Chemical, Pharmaceutical, Manufacturing, Retail, and Logistics. Proven ability to manage complex, high-visibility projects, consistently delivering on time and within budget while exceeding customer satisfaction targets. Expertise spans both on-premise and on-demand SAP solutions.

- Led 15+ successful SAP implementation/rollout projects, resulting in increase in operational efficiency, reduction in IT costs.
- Consistently achieved high customer satisfaction ratings on all projects.
- Expert in all phases of the project lifecycle, from requirements gathering and fit-gap analysis to scope definition, project planning, workshop facilitation, and solution demonstrations.
- Successfully managed project teams of 20+ resources, ensuring effective collaboration and timely execution.
- Proficient in SAP Ariba (Upstream, Downstream, CIG, Commerce automation) and have a very good knowledge and hands-on experience in various SAP modules e.g., TM, S/4HANA, ECC, FI/CO, MM, PP, SD, IM-PS, SAP PO.

## EXPERIENCE

### Independent Freelancer 07/2024

#### Google / Waymo (Alphabet Inc.): Hyderabad, India

##### Source-to-Pay Specialist, Waymo India (formerly Google Self-Driving Car)

- As one of the few IT personal at Waymo India, I played a key role in establishing and optimizing the Source-to-Pay (S2P) ecosystem. I was responsible for the IT management of all S2P applications and processes, driving innovation and streamlining critical workflows.
- Spearheaded the implementation and optimization of multiple SAP Ariba projects, including upstream, downstream, product sourcing, commerce automation, and supplier risk management.

- Introduced innovative solutions to enhance S2P processes, developed a new automated supplier onboarding process that reduced processing time.
- Streamlined supplier onboarding and update processes, resulting in a 15% reduction in onboarding time.
- Implemented key features within SAP Ariba, such as import requisitions, contract-based invoicing for utility payments, supplier sanction screening, and a document manager for supplier communication.
- Integrated Ironclad (contract management system) with SAP Ariba contracts
- Implemented delta approval flows for purchase requisitions, improving approval efficiency by eliminating the approvals of top management for small value changes.
- Evaluated and contributed to the selection of key S2P-related systems, including Sievo (data analytics), SpendHQ (spend intelligence), Relish (supplier data validation), and Rapid Ratings (financial scoring).
