 • **Problem Solving** • **Teamwork** • **Quick-Learner** • **Time Management**

PROJECT

Recruitment Website
Tools & Technologies: React JS, JavaScript, Tailwind CSS, Html, Github, VsCode
- Built a responsive recruitment website using React.js for a seamless user experience.
- Styled the website with Tailwind CSS, ensuring consistent and modern UI design.
- Created dynamic components for features like job listings and search functionality.
- Utilized React Router for efficient navigation and component reusability.
- Focused on front-end performance and optimized the website for various screen sizes.
- Deployed the website on platforms like Vercel for live access.

University Management System   **Github**
Tools & Technologies: Java, JFrame, AWT, PostgreSQL, Intellij IDE
- Developed a **Deskstop Based Application** comprehensive University Management System to manage Student, Faculty, Leave, Fees and Course information.
- Utilized Java Swing (JFrame) and AWT components to create an intuitive and user-friendly graphical user interface (GUI).
- Implemented PostgreSQL database to handle data storage, retrieval and management efficiently.
- Designed various modules including student registration, faculty assignment, course scheduling, and grading system.
