Senior Python Developer
PCGI systems

I am working as team lead and solution architect in the organization and my responsibility is to write and testing code, debugging programs and integrating applications with third-party web services. Working as Team Lead and the working Technologies are Python, Machine Learning, Jira, Pandas, Numpy, SciPy, SQL Database, AWS s3, EC2, REDSHIFT, RDS, SAP, HANA, MSSQL, Salesforce Other ETL Tools. Roles and responsibilities are: * ETL Developer * Clarifying user stories with Product Owner / Business Analysts. Effort estimation in terms of story point during each sprint planning. * Collected support team data for equipment failure analysis. * Designed models to analyze customer behavior and perform time series forecasting. * Worked with technical support team to understand the Jobs failure patterns. * Develop architectural standards and best practices for application coding and ensuring it is being followed. * Development and unit testing user stories following project architecture and best coding practices. * Performed deployment activities on development and test environments using Python * Implementing generic components to be used across application. * Code review across scrum teams. * Web scraping using python

Nov 2018 - Jul 2020

Application Development Senior Analyst
Accenture

Worked as Application Development Senior Analyst and working Technology Matlab, Python, Machine Learning, Jira, Pandas, Numpy, Scipy, SQL Database, Other ETL Tools. Roles and responsibilities are: * ETL Developer * Clarifying user stories with Product Owner / Business Analysts. Effort estimation in terms of story point during each sprint planning. * Collected support team data for equipment failure analysis. * Designed models to analyze customer behavior and perform time series forecasting. * Worked with technical support team to understand the Jobs failure patterns. * Develop architectural standards and best practices for application coding and ensuring it is being followed. * Development and unit testing user stories following project architecture and best coding practices. * Performed deployment activities on development and test environments using MATLAB/Python * Implementing generic components to be used across application. * Code review across scrum teams. * Web scraping using Matlab and python

Apr 2017 - Nov 2018

Matlab Developer

IQRA Software Technologies Pvt. Ltd, Lucknow

•Creating Jobs using Machine Learning Predictive Algorithms •Data processing using python •Fetching data using using different format of existing data, Web Scraping, and, other 3rd party data resource(Zema, Nrgstream) • ETL process •Load json/.mat/Csv/Excel data and Generate Report using these data •SQL Database is used for store Actual and Derived Data

Hysteresis current control technique to Reduce THD and attain High Power Factor in Rectifier based c

The significance of project is to Reduce Harmonics of Converter circuit which is generated by semiconducting switches i reduced THD up to 1,5% By Hysteresis inner control loop and Attain Unity Power factor by outer voltage control Loop
